DETAILED ACTION

Response to Amendment/Arguments

1. This Office Action is in response to the Response/Amendment filed on August 28th, 2008. Claims 2 and 13 are now canceled. Claims 1, 3-12 and 14-28 are now pending in the application.

Response to Amendment/Arguments

2. The 35 U.S.C. 103(a) rejection to claims 1 and 12 has been withdrawn in light of applicant's amendment filed on 28 August 2008.

Allowable Subject Matter

3. Claims 1, 3-12 and 14-28 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

Claims 3-11 and 14-28 are allowed as indicated in previous office actions.

The response filed 08/28/2008 incorporates the subject matters in the objected claims 2 and 13 into base claims 1 and 12, respectively. In doing so, the response has placed the instant application in a favorable condition for allowance. Thus, the prior art of record, considered individually or in combination, fails to fairly show or suggest the claimed method/apparatus for switching a telephone call between different networks, the novel and unobvious limitations as following:

“setting a first transmission factor and a first reception factor according to a predetermined minimum quality of service level requirement based on the destination of the telephone call; receiving a second transmission factor and receiving a second reception factor responsive to the quality of service provided by the internet protocol network” for connecting the telephone call through IP network or other networks, structurally and functionally interconnected with other limitations in a manner as recited in claimed invention of base claims 1 and 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ho, Anthony (U.S.6,452,922) and **Abaye et al.** (U.S.7,260,060) are all cited to show devices and methods for improving the call control over networks in telecommunication architectures, which are considered pertinent to the claimed invention.
